

BRINGING THE WORLD TO SAVANNAH

The Georgia Tech-Savannah campus is thriving with courses specifically designed for the coastal region. Having worked with area business and community leaders, we have developed a curriculum that impacts the most residents in the greater Savannah area, including:

Business Community: public and custom professional development courses to optimize employee performance.

Veterans: award-winning military program to facilitate the transition to the civilian workforce.

K-12 Students: outreach efforts to boost access to STEM education.

Coding Boot Camp: 24-week intensive full-stack web development course with classes on nights & weekend.

Supply Chain & Logistic Institute: workforce development courses, online training, supply chain short courses, executive seminars and custom courses

OSHA: nationally recognized OSHA programs continue to provide students with the skills necessary to reduce accidents, save their companies money and lower workers' compensation premiums.
